Under said conditions the Braceville Township Zoning Inspector may permit the use of trailers under eight hundred (800) sq. ft. or other building for a six month period.

A Zoning Certificate when obtained by an applicant shall not be transferred to another person or to another property and the fee paid therefore shall be non-refundable.

A Zoning Certificate shall expire at the end of ninety (90) days from the date of issuance, and unless construction, location, change of use of, or alteration of any building or premises is not commenced within said ninety (90) days period, a new application for another Zoning Certificate must be made with the Braceville Township Zoning Inspector. SECTION 26: EROSION AND SEDIMENT CONTROL

- (1) The purpose of these regulations is to establish technically feasible and reasonable standards to achieve a level of water management and sediment control that will minimize damage to property and degradation of water resources and wetlands, and will promote and maintain the public health and safety.
- (2) These regulation are intended to:
 - (a). Allow development while minimizing increases in downstream flooding, erosion and sedimentation.
 - (b). Reduce water quality impacts to receiving water resources and wetlands that may be caused by new development or redevelopment activities.
- (3) These regulation apply to all of the permitted and conditional buildings, structures, and uses set forth in every zoning district in this Zoning Resolution, except as otherwise provided herein.
- (4) For the purpose of these regulations, the terms used herein shall have the meaning as set forth in the most recently adopted version of the Trumbull County Erosion and Sediment Control Rules. Said terms are adopted and made a part of these regulations as though fully rewritten herein.
- (5) Requirements and Application Procedures
 - (a). Two (2) sets of Erosion and Sediment Control (ESC) Plan shall be included with the application ofr a zoning certificate for any of the principal permitted, accessory, or conditional buildings, structures, and uses or off-street parking, loading/unloading areas allowed by this resolution and any additions or alterations thereto.

SECTION 27: PUBLIC UTILITIES / RAILROADS / WIRELESS COMMUNICATION TOWERS

This resolution shall not apply to public utilities and railroads, except that the provisions of this zoning resolution shall fully apply to the location, erection and maintenance of all wireless communications towers to the extent permitted in Section 519.211 Ohio revised Code or any amendment thereto or successor statute permitting regulation of said wireless communications towers, structures and/or devices.

1. INTRODUCTION:

Increasing technological advances in the telecommunications Industry has created a demand for Personal Communication services such as cellular telephone, facsimiles, computer e-mail and other wireless data applications. The recent passage of the Telecommunications Act of 1996, designed to promote competition, spur private investment and advance affordable telecommunication services, has resulted in the need for the construction of additional services facilities, towers and antennas. These new facilities may be regulated by local zoning to protect the health, safety and welfare of the general public as well as maintain an objective or community aesthetics. While the act preserves local zoning authority to regulate the number, placement, construction and modification of wireless/cellular telecommunications towers and facilities, it also places certain conditions for the approval or denial of a permit. These conditions provide that the zoning regulations may not unreasonably discriminate among providers of similar services; requests for facility placement must be within a reasonable period of time similar to the review process of other comparable applications; any decision to deny a request to place, construct or modify a wireless telecommunications facility shall be in writing and supported by substantial evidence contained in a written record; and, since the Federal Communications Commission is the only entity permitted to regulate radio frequency emission levels, zoning regulations therefore cannot deny a request based on concerns associated with these emissions and any health risks posed by them.

2. PURPOSE:

The purpose of this Section is to establish regulations and standards for the location and erection of telecommunications towers to protect the health and safety of the general public in pursuant to Section 519.211 of the Ohio Revised Code and any amendments thereto.

3. NOTIFICATION REQUIREMENTS:

Any person who plans to construct a telecommunications tower in an area subject to township zoning regulations shall comply with the notice provisions of Section 519.211 (B) (3) and any amendments thereto.

If the property owner or member of the Board of Trustees who receives notice as prescribed above gives notice pursuant to section 519.211 (4) (a) of their objection to the proposed location of the telecommunications within 15 days after the mailing of the

notice of intent to locate a telecommunications tower sent under section 519.211 (B) (3) (b) ORC, the board shall request that the clerk of the township send the person proposing to construct the tower, written notice that the tower is subject to township zoning and requires the application for and issuance of a zoning certificate. The notice shall be sent no later than five (5) days after the earlier of the date the Board first receives such a notice from the property owner or the date upon which a board member makes an objection. Upon the date of mailing of the notice sections 519.02 to 519.25 shall apply to the tower.

If no notice or objection by a property owner or board member is timely received, the location of the tower will be exempt from these provisions pursuant to Section 519.211(A) as required therein.

4. PERMITTED USES:

- A. Wireless telecommunications towers and facilities are permitted uses in all non-residential zoning districts and on property with a non-residential use that is a permitted use within a residential district, including but not limited to a church, hospital, school, municipal or government building and property with an agricultural or utility use subject to the requirements of this section.
- B. Wireless telecommunications towers and facilities are not permitted uses in any residential district except as noted above, but may be permitted as a conditional use where it is not technically feasible to be located in a more appropriate nonresidential zoning district, subject to the Conditional Use permitting process.
- C. Collocation of antennas on existing towers, antennas attached to existing structures and buildings, or replacement towers to be constructed at the site of a current tower are permitted uses and will not be subject to the Conditional Use permitting process.
- D. Wireless Telecommunications Towers and Facilities may be permitted as a sole use on a lot, combined on a property with an existing use and/or combined with an existing non-residential building or structure subject to the requirements of this section.

5. GENERAL REQUIREMENTS:

The following requirements apply to all telecommunications towers and facilities regardless of the zoning district in which they are to be located:

the Telecommunication Industry Association.

- C. An applicant shall provide proof that the proposal to construct a tower or attach equipment to an existing structure has been approved by all other agencies and governmental entities with jurisdiction. (i.e. Federal Communication Commission, Federal Aviation Administration, Ohio Department of Transportation)

Any applicant requesting permission to install a new tower shall provide evidence of written contact with all wireless service providers who supply service with a quarter mile of the proposed facility. The applicant shall inquire about potential collocation opportunities at all technically feasible locations. The contacted providers shall be requested to respond in writing to the inquiry within 30 days.

The applicant's letter(s) as well as response(s) shall be presented to the Zoning Commission as a means of demonstrating the needs for a new tower.

- E. All providers utilizing towers shall present a report to the Zoning Commission notifying them of any tower facility located in the Township whose use will be discontinued and the date this use will cease. If at any time the use of the facility is discontinued for 180 days, the Zoning Commission may declare the facility abandoned. The facility's owner/operator will receive written notice from the Zoning Commission and instructed to either reactivate the facility's use with 180 days, or dismantle and remove the facility. If reactivation or dismantling does not occur, the Township will remove or will contract to have the facility removed and assess the owner/operator the costs.
